## 🔗 Eastern Sun HD

Eastern Sun mod ported for Diablo 2 1.13c

The Eastern Sun mod was quite fun back in the day. Alas, the official support for the mod ended with Diablo version 1.10f. I modified the files to be compatible with 1.13c and tried to simplify the installation process as much as possible.

The mod performs well in Single Player and in TCP/IP games. I have fixed any crashes I stumbled upon.

Open Battle.net servers with PvPGN and D2GS act unexpectedly, I don't have the time and nerves to attempt fixing all the issues there.

The credits for the mod and its resources go to their respective authors.

## Modifications

---

- In the original mod various items are set to be available only on Ladder servers. In this mod **ALL items** can be obtained in Single Player, TCP/IP, and Open Battle.Net games.
- Large number of items were set to be obtainable only via Gamble. This kills the logic behind adventuring. **ALL items** should now be available for finding in the open world.

## Plugin Support

---

As part of the mod I've included the following plugins:

- SlashDiablo's HD plugin

- PlugY
- BaseMod
- Project Diablo 2's version of SlashDiablo's BH Maphack (+*LootFilter support -MapHack*)

Credits for these plugins go to their respective authors. I have added small modifications to them to make them compatible with Eastern Sun

## Installation

1. Buy Diablo II and Lord of Destruction expansion
2. Download the latest version (1.14d) from Blizzard's website
3. Download the latest release of the mod from GitHub Releases page
4. Extract the archive in a subfolder of your Diablo II's installation directory Example:

Installation directory: C:\Program Files (x86)\Diablo II

Directory to extract ESHD in: C:\Program Files (x86)\Diablo II\ESHD\

5. Stat the mod by running the *Game.exe* from the **ESHD** folder
